

# INTRODUCTION

The U.S. Olympic Trials is the best national track meet in the world, and there is no athletics meeting quite like the Trials. The Olympic Games and World Championships may have a higher overall standard of performance, but no national track championships can compare in terms of quality. It is not merely a question of statistical performance; the qualification process for the Olympics is more intense for Americans. Other nations generally use their Trials plus the seasonal record of top athletes, but there are very few instances of the sudden-death form of selection that the USA uses. Make the top-three in your event, and you are on the team. Have a slightly off day, and you are out. The history of the sport is strewn with the debris of world record holders who missed out on Olympic glory because they made a mistake or were ill during the Olympic Trials. For many participants making the USA team is more of a problem than winning an Olympic medal, and the result is that the Olympic Trials have an element of drama that is beyond the scope of even the Olympic Games.

The structure of the U.S. Olympic Trials has changed and developed since the first meetings in 1908. Prior to that year there was no elimination process. The presence of athletes at the Olympics between 1896 and 1906 was due primarily to certain colleges and clubs, as well as individual athletes. Princeton and the Boston Athletic Association, plus an individual entry - James Connolly of Harvard, the first gold medallist of the modern Olympics - were the initial representatives of the USA in the Athens Games. In 1900, there was no official team, but eight colleges plus the New York Athletic Club sent athletes, while 1904 saw St. Louis hosting what was almost entirely an American Clubs meeting, with a smattering of individual entries in support.

For 1908 and 1912, the system changed, with area trial meets, which served as a guide for selection. In 1908 these were the Western (Stanford - May 9), Central (Chicago - May 29), Collegiate (IC4A in Philadelphia - May 29-30), and finally the Eastern Trials (Philadelphia - June 6). The team was selected two days later in two tranches, being the official team whose travel costs were met by the U.S. Olympic Committee, and a supplementary list of athletes who had to cover their own expenses. In 1912, there were three Trials meetings, beginning with the Western (Stanford - May 17), and followed by the Central (Evanston - June 8) and Eastern (Cambridge - also June 8). The team was selected by the USOC and the AAU, with the winners of the Eastern Trials receiving automatic selection - reflecting the bias of AAU president James Sullivan.

The three decathlon Olympic Trials for that year ranged from the sublime to the ridiculous. The Western trial took place with one decathlete competing against specialists, and retiring after the first day's events; the Eastern event was cancelled after only two entries were received, and the central event was scored on a point-for-place system, rather than using the new tables devised for the Stockholm Games, which would have resulted in a World Record for the winner, J. Austin Menaul.

The nature of the Olympic Trials changed in 1920 out of necessity. In the 1912 Olympics, 11 Americans had competed in the 100 meters. In 1920 the number of athletes allowed from a single country in any event in the Olympics was reduced to four, which was further lessened to the present 3 in 1932. The Olympic Trials of 1920 doubled as the AAU Championships, which was also the case in 1928, 1932, 1992, 1996 and 2000. Qualification for the Olympic Trials was via "semifinal" Trials held on June 26 in Chicago, New Orleans, Pasadena and Philadelphia, while a few more athletes qualified through an Armed Services meeting in St. Louis on June 3-5. The 3000-meter steeplechase, not regularly held outside Europe, took place on July 10 at Travers Island, N.Y., and the decathlon in New York on July 9-10. The Trials for other events were held on July 16-17 in Cambridge, Mass. Although the top-4 was the guide, the final team was selected by the USOC/AAU committee.

1924 saw a similar format, with final try-outs held on June 13-14 in Cambridge, after semifinal meetings on May 31 in Ann Arbor, Cambridge, Iowa City and Los Angeles. While the first four in each event was the general rule for selection, there were 16 choices of athletes outside the top-4 made by the committee. The decathlon was held two days prior to the main Olympic Trials in New York and was completed in a single day.

The Olympic Trials were held in Cambridge for the third consecutive (and final) time in 1928, except for the 400, 400h and decathlon which took place in Philadelphia on July 3-5, two days prior to the main two-day meeting. With the advent of women's olympic track and field, a separate meeting was held in Newark, N.J. on July 4. The women's meeting would be kept separate from the men's until 1978. Fourteen qualifying meetings were held between May 18 and June 30, showing the expansion of track and field throughout the USA.

In 1932 the AAU/OT was held in Stanford on July 15-16, and the women's AAU took place in Evanston on the same weekend, with just two weeks break before the first day's track and field in the Los Angeles Olympics. Although this may have seemed to be almost indecently close to the Games, previous periods of 3-4 weeks after the tryouts did include the laborious journey by ship across the atlantic. It was not until 1952 that the U.S. team was able to fly to Europe for the Olympics. There were 18 preliminary meetings in 1932, with six semifinal tryouts including the IC4A and NCAA championships, all of which helped hone down the number of entries for the OT. Only

the 110h had more than one preliminary round, as compared to all track events up to 400 in 1928. The decathlon team was selected from the AAU meet (Evanston - June 24-25), and the 50k walkers from the AAU (New York - June 5) plus the winner of a separate Olympic Trials race in Los Angeles on July 3.

For the first time since 1924, the Olympic Trials were separated from the AAU Championships, with the AAU on July 3-4 in Princeton, N.J. and the OT on July 11-12 at Randall's Island, N.Y. The qualification for the Olympic Trials had been via the NCAA Championships (Chicago - June 19-20), and Semi-final Tryouts on June 26-27 for the the East (Cambridge), Central (Milwaukee - which incorporated the AAU/FOT decathlon), and West (Los Angeles). The women's AAU/FOT meet was in Providence, Rhode Island the same days as the men's AAU, and the 50k walk selection race was the AAU event in Cincinnati on June 27. Attendance for the 2-day Trials meeting was 34,000.

The post-war Olympic Trials of 1948 were less elaborate, in that the final Trials, held in Evanston on July 9-10, were preceded by just 2 semifinal meetings - the NCAA (Minnesota - June 18-19) and the AAU (Milwaukee - July 2-3, with the women's qualifying meeting this time being a separate FOT at Brown University stadium in Providence (July 12). The top-6 finishers at the NCAA/AAU made it into the try-outs, and this was to be the basis of qualification, together with the winners at the Armed Services championship, for the Trials until 1964. The AAU 10000m event served as the Trials event, and the AAU decathlon and 50k walk were held at Bloomfield, N.J. (June 26-27) and Cincinnati (May 16) respectively.

The first of five consecutive California-based final tryouts was held at the Los Angeles Coliseum on June 27-28, 1952, and the crowd totalled 35,795 (with a capacity for two days of 203,000). The women's meeting was again held on one day, at Harrisburg, Pa. on July 4. The preliminary meetings had been the All-Services Championship at Long Beach (June 7-8), NCAA at Berkeley (June 13-14), and the AAU - also at Long Beach (June 20-21). The climate of California further dominated events in 1956, with the FOT again in the Los Angeles Coliseum (June 29-30), after the NCAA meet at Berkeley, the Armed Services meeting in Los Angeles (both June 14-15), and the AAU in Bakersfield (June 22-23). The crowd this time was almost double that of 1952 at 71,000. The women's meeting was for the first time a final Olympic Trials meeting separate from the AAU championship, and was held in Washington, D.C. on August 25.

Stanford was the venue for the 1960 Olympic Trials on July 1-2, after a repetition of the NCAA/AAU venues from 1956 of Berkeley (June 17-18) and Bakersfield (June 24-25). The OT meeting attracted a record two-day crowd of 108,000, with 62,000 attending on July 2. The Armed Services championships were held at Quantico on June 10-11. The AAU 10,000m at Bakersfield was the OT event, and the AAU events for the 20k walk (Baltimore - July 17), 50k walk (Pittsburgh - July 3), and decathlon (Eugene - July 8-9) functioned as Olympic qualifying events.

In 1964, the pattern was changed, as it was considered that the gap between the USA season and the October Tokyo Games was too long for the normal selection basis. An additional stage was interposed - semifinal Olympic Trials at Randall's Island, N.Y. with final Trials in Los Angeles on September 12-13. The qualifying meetings for the New York meeting were again the Interservices championships (Quantico, June 5-6, NCAA (Eugene, June 18-20), and AAU (New Brunswick, N.J., June 26-27). As usual, the walkers were selected from the AAU championships for 20k (Pittsburgh - July 5), and 50k (Seattle - September 5). The women's Trials were held in New York (August 6-8). The winners in the men's semifinal Trials in July were guaranteed an Olympic place, as long as they showed reasonable form in the final Trials. This proved to be temporarily contentious in only one event - the 200 meters where world record-holder Henry Carr finished 4th. The selectors took Carr ahead of 3rd placed Bob Hayes, and he responded with a gold medal 20.36 win in Tokyo.

The 1968 selections followed the 1964 format, with semifinal Trials held in June (Los Angeles - June 29-30) and final Trials in September (Echo Summit, Ca. - September 6-16). The venue for the OT was an attempt to emulate the atmospheric conditions to be met in Mexico City at the Olympics, but the location of the track was the most bizarre in Olympic Trials history. On the infield, close to the side of the track, was a large collection of pine trees, with a cluster towards the end of the back straight, which meant that athletes disappeared from view on each lap. The historic trees could not be moved by agreement between the local residents and the US Forestry Department. The women were not catered for in quite the same way, as their Olympic Trials were at low altitude Walnut, Ca. with the pentathletes qualifying from the AAU meet in Columbia, Mo. (both meets on August 24-25), Walking events were held at high altitude Alamosa, Col. (September 7 - 20k, and September 10 - 50k). The attendance for the 8-day meeting was approximately 100,000, split between temporary seating and the hillside overlooking the track, but the venue was not designed for selling tickets. Initially it had been set up as a training facility for the high altitude Olympics.

In 1972 the system of qualifying changed from preliminary meetings to specific standards for each event, which resulted in the Olympic Trials being held over 10 days between June 29 and July 9 (in Eugene, Or.) with 109,800 total attendance, and enabled the meeting to be structured in the same way as the Olympics. However, the women were still segregated, with their meeting being held over two days (July 7-8) in Frederick, Md.

It was in 1976 that a unified Olympic Trials meeting was finally seen, with both men and women congregating in Eugene between June 19 and June 27 in front of a crowd totalling 105,500 for the 8 days (an average of 13,187 per day - in a stadium with a standing room capacity of 16,300), while the marathon trial took place on May 22 (also in Eugene). During the 1970's, Eugene was considered the running capital of the USA, and so it was no surprise when the attractive university town hosted the Olympic Trials for a third consecutive time in 1980 - this time from June 21-29. The 50k walk took place in Niagara Falls on May 10. For the first and only time, the Trials were for the most part meaningless, as President Carter had determined that the USA would boycott the 1980 Olympics, in one of the most mindless political acts of interference in the history of sports. It was a tribute to the Eugene fans that 121,727 attended the Trials of 1980.

The one thing that could be guaranteed in 1984 was that there would be retaliatory action from the Eastern bloc, and so it was that the USSR and all Soviet satellites, other than Romania, boycotted the Los Angeles Olympics. This was the first occasion that the U.S. Trials and the Olympic Games were held in the same stadium. The Trials were held from June 16 to June 24, and curiously the Junior AAU championships were held concurrently from June 22-24, as it was thought that the programme for the senior event would be a little "thin" on those days in emulating the Olympic Games timetable. The crowd exceeded those of Eugene by a fair margin, with a total of 143,826 for the eight days, but was small when comparing the capacity of the Coliseum with that of Eugene's Hayward Field.

The seat of athletics in the USA, Indianapolis, was the host of the 1988 Olympic Trials, from July 15 to July 23. All events other than the marathon events (Men: Jersey City - April 24, Women: Pittsburgh - May 1) were held in Indianapolis, with a small (90,070 for 8 days) but enthusiastic crowd privy to the usual remarkable display of athletic virtuosity. Record temperatures, reaching 115 degreesF (46 degrees C), assisted performances, at least in the explosive events. The same was true in 1992, when New Orleans hosted the Trials. The Trials were supposed to duplicate the conditions of the Barcelona climate which could be expected at the Olympics, but with humidity reaching 88% on two of the eight days, the climate was somewhat removed from Mediterranean, and the Trials were frequently a question of survival, although thankfully conditions became better for both athletes and spectators after sunset. The attendance of 137,262 for the eight days was close to record levels.

1996 saw the Trials held in Atlanta, Olympic host for that year. A record number of fans - 151,522 - turned out to see eight days of track and field held in increasingly hot conditions, with the last day reaching 94 degrees in the shade, with significantly higher levels on the infield. The heat gave grounds for fears that it would be too hot a month later for the Olympics, but as it transpired, conditions were cooler at the Games than at the Trials. Marathon Trials were held in the Carolinas (Women - Columbia, SC - February 10/Men - Charlotte, NC - February 17), and the 50k walk in LaGrange, Ga. on April 20. Unlike Los Angeles, where the facility was already in place before the Trials, the stadium was still being worked upon during the Olympic Trials, and the organization was hindered by tiers of local bureaucracy which did little to engender affection from the fans and media.

Sacramento played host to the 2000 Trials, with the 50k walk starting proceedings on February 13, to be followed by Marathon Trials (February 26 in Columbia S.C. for the women, and May 7<sup>th</sup> in Pittsburgh for men), and the main track Trials exactly a month later than Atlanta, namely July 14 to July 23. Sacramento had been host in 1968 to the AAU championships which saw an orgy of 100m sprinting, but the venue then was Hughes stadium, while Sacramento State University's Hornet Stadium was now the location for America's most important track and field meeting. The success of the meeting, with a record total of 187,104 turning out to watch, meant that Sacramento was elected to be the host of the 2004 Trials, the first repeat host since Eugene in the 1970's.

No heats were held for the men's and women's 10,000m, a wise decision in view of the possible high temperatures in inland California. Additionally rounds of the sprints and hurdles were cancelled to avoid meaningless first round races - generally run in the past to ape the Olympic timetable.

# OLYMPIC TRIALS QUALIFYING STANDARDS

Standards for the Olympic Trials have been in place since 1972, evolving as follows:

For 1972 onwards it was determined that all fields have a minimum of 24 athletes (except in the 100-400, plus 110h - where the minimum number was 32), so in the 1972 Hammer for example, 58.14 was the low qualifier. Standards of 2:20:00 for the marathon, and 1:35:00 for the 20kW were applied.

In 1980, separate standards were set in events where it was thought that there might not be enough qualifiers. These are marked above with an asterisk. The secondary standards were: 1:48.2/ 3:41.5/ 13:50.0/ 28:46.0/ 8:40.0/ 62.18. Additionally walks standards of 1:35:00 (20k), and 4:35:00 (50k) were applied.

As standards were often not met between 1972 and 1988, it was determined that 1992 and 1996 requirements should allow for provisional qualifying standards where fields were not deep enough. In 2000 two standards were listed – an A standard which enabled such qualified athletes to be funded to the meeting, and a B standard which qualified athletes to make their own way to the meet. These standards were as follows (with the minimum size of field for 1992 and 1996):

## WORLD RECORDS AT THE US OLYMPIC TRIALS

The following marks are world records set at the U.S. Olympic Trials.

Performances in bold type were ratified IAAF records, while other marks were statistically acceptable but not ratified - either because they were not put forward (as in the case of auto-times prior to 1976 which were not acceptable as IAAF records) or were not accepted for one reason or another. Efforts with the suffix = were equal to the then accepted record.

+ - Ray won the fastest of the 3 marathon races in 1928, but this was not an official trials qualification race.

## Longest span of competition in Olympic Trials, in years

24 -	John Deni/50W (1932-56) Al Oerter/DT (1956-80) Ed Burke/HT (1960-84)	28 -	Stella Walsh (1928-56)
20 -	Al Hall/HT (1956-76) Jay Silvester/DT (1960-80) Johnny Gray/800 (1980-2000)	20 -	Francie Larrieu-Smith/1500-Mar (1972-92) Karin Smith/JT (1972-92) Martha Watson/400R-LJ (1960-80) Willye White/LJ (1956-76)
16 -	Hal Connolly/HT (1956-72) Ernest Crosbie/50W (1932-48) Henry Dreyer/HT (1936-52) Ron Laird/20W-50W (1960-76) Carl Lewis/100-200-LJ (1980-96) Joe McCluskey/St (1932-48) Larry Myricks/LJ (1976-92) Dan O'Connor/20W-50W (1976-92) John Powell/DT (1972-88) George Young/St-Mar (1956-72)	16 -	Ruth Wysocki/800/1500 (1976-96) Jackie Joyner-Kersey/LJ-HEP (1980-2000) Kate Schmidt/JT (1968-84) Jane Frederick/PEN-HEP (1972-88) Evelyn Ashford/100 (1976-92) Mary Slaney/1500-5k (1980-96)

Of those shown in the above list, only Ed Burke competed in as many as 7 Olympic Trials meets, as WWII precluded Deni from the opportunity of OT meets, and Al Oerter took time out in 1972 and 1976. In addition to the above, Clarence DeMar, the most durable top class American marathoner of all-time made the US team in 1912, 1924 and 1928, and placed among the top-16 as late as 1936, 24 years after his debut. He competed in the 1948 Boston marathon, but placed more than an hour behind the top US finisher. As a corollary, John A. Kelley ran in the 1932 Boston race - but Dnf, made the Olympic team in 1936 and 1948, and ran in the 1952 Boston race - but both men are excluded from the list above, as there was no specific Trials race during their era.

In both 1928 and 1956 Walsh failed to make the sprint finals, but won the 100 in 1932 and a silver in 1936 as Stanislaw Walasiewicz - for Poland. After her death she was determined by autopsy to have hermaphroditic features.

Al Oerter missed making it 28 years when he injured himself in the TAC discus in 1984; he was still throwing beyond 190' in 1988, further than his 1956 Olympic winning distance (184'10").

Note that there are U.S. Olympians not included in the above list, who would have been included had there been Trials events in their era. James Mitchell was 40y 7m old when competing in the 1904 Discus, Ralph Rose 19y 5m at the same Games, and Ray Ewry was 34 3/4 when competing in the 1908 standing HJ/LJ events. Note also that Charles Hunter, reputedly born May 1875 (and supposedly 45 when competing in the 1920 Olympics) died in May 1975 and was probably in his 20's at the '20 Olympics. Ken Martin finished second in the 1992 Trials 10,000m at the age of 33-288 but did not have a qualifying mark and so did not make the team. Only 2 athletes – Dwight Stones and Carl Lewis figure in both the “youngest” and “oldest” lists. While there were 25 additions (10 men, 15 women) to the “oldest” list in 2000, there were no new “youngest” athletes (other than 3 in their 20's in new events for women).

a = First, chronologically, in a series of selection races

E = Eastern Olympic Trials// W = Western Olympic Trials

“ = 1980 a leap year, so Floyd 18-365, one day short of his 19th birthday.

& = Hunter listed below 6th place, as “also competed”, but ran and placed 7th in heat 3 of the 5000 in 1920. He is listed as born in May 1875, and is assumed as 31 May 1875, the latest possible date, for this list.

\* = Arthur Newton won a special marathon selection race in 1900, held over 15 miles, before the marathon distance was standardized.

@ = Did not compete in, but selected after, the Trials - the date taken for his age.

# = Price-Smith (30-025) won the Shot in 92, but declined selection.

The top-3 in the 1980 400m were all teenagers, as were the 1-3 in the High Jump in 1964, 1968 and 1976.// ++ = First US finisher, 3rd in competition.

Didriksen may have been as young as 18 or as old as 21 at the 1932 OT.
