Here's some basic tips to getting started if you're a complete n00b: The game allows you to enter a map, most commonly with 2 other players, in a 3v3 set up (this depends on the events, but we'll get to that in a minute). You play as a Brawler. These Brawlers are the game's characters. There are currently 15 Brawlers available. You start with one and as you play you unlock new brawlers. These brawlers also have various types. Some are fighters or healers while others are assassins or sharp shooters. Each brawler has an Attack, Super and Star Power. One of our favourite n00b brawlers is Nita. The evil little kid in the bear hat. She is able to rupture or play overbearing depending on what you need but her Star Power is Bear With Me - where she releases her own bear into the arena to fight on her behalf. The more you play, the more brawlers you unlock. The best way to learn their skills is to play with them and level them up. Easy! Now to the events.

The game itself allows for 9 various types of games that you can brawl. The 15 non ticketed events are Bounty, Brawl Ball, Gem Grab, Heist, Solo Showdown and Duo Showdown. You'll likely start with some of these. The 15 ticketed events are Robo Rumble, Boss Fight and Big Gone. The events are explained to you so you'll be able to follow relatively quickly. What you'll need to master is the controls. On the left side of the screen you drag your finger around to control your Brawler's movement. On the right hand of the screen you drag your finger around to aim and fire - so to attack. Ideally, you want to hold your phone like a game controller and use a left hand thumb for movement and right hand thumb for attacking. The finger dragging is a bit like moving a joystick around. Attacking can be done in a variety of ways - you can drag to aim and release to fire a long range attack or tap the right quickly for rapid fire. As you cause damage you'll power up your Super Ability. When this is fully powered you'll see the yellow button on the right ready to go. You'll need to hold it and drag to aim - and thus target your super ability - or you can rapid fire it to release right where you are.

There's a reason Brawl Stars is dominating social media discussions and being added to tournaments - it's a fun game. Free for both Android and iOS the mobile fighter game or party brawler, if you like, is 15 to 4 minutes of giggles that even your mom will enjoy (and she'll stop playing Candy Crush, so everyone wins).

Achieving cheats in Brawl Stars can be achieved in several ways: Each one hacks the game client itself using either a hacked APK or hacked iOS game app to be able to implement cheats into the game itself or one uses scripts, memory editors and other game hacking tools to inject code into the game to improve the way it works and to implement hacks. An advanced Brawl Stars Hack will most likely allow you to select from lots of trainer or cheating options and allow you to toggle individual hacks in a Mod Menu for Brawl Stars. Possible hacks may include depending on the version and platform of the game: Speedhacks, unlimited ammo, faster Special generation, damage hacks, Wallhacks / ESP / VAC, Aimbots, Aim Assist, auto Ability, Auto Special and more. What cheats are possible really depends on which server checks and what client-side processing is performed by the Brawl Stars game. If you should be looking for a working Brawl Stars Hack to download, then we do suggest that you use this approach of finding and downloading hacks to be able to keep your account safe.

Brawl Stars technically comes shipped with an auto aim button that you need to use in most single match, the 'aimbot' the game provides really only works in short-range situations or if you're using AoE attacks, shotguns or come in very short range encounters. Playing at higher Trophy levels in Brawl Stars will demand manual aiming, prediction and careful calculation of bullet travel time, range, target trajectory and cover to be able to maximize damage. – This is exactly what a Brawl Stars Aimbot can do for you. It can not only aim accurately, but to track targets, calculate the way an opponent is moving, your bullet speed and travel time to be able to hit as much shots as possible. Needless to say it is impossible to predict all movement at all times, as it is determined by players, but AI can make very educated guesses concerning in which a target will be. Aimbots are usually most effective on trower brawlers or long range brawlers, such as Colt, Bo, Barley, Ricochet, Dynamike ect. The aimbot is one of the most powerful hacks available for download on any mobile shooter and multiplayer action game and

that included Brawl Stars as well. This kind of cheat will help you farm coins, brawlers and free gems more efficiently and raise through the trophy road quickly.
